

I receive many junk faxes but their phone numbers are unlisted and sender does not include any ID. The law is well intended but ineffective due to inability to enforce it by me as an individual and inaction by Federal agencies. Fax.com is but the worst of many offenders still out there and I have no way to ID if it is them or someone else I am getting this junk from. I would be happy to send you TIF format files of the offending faxes.
